Why Thewise?

The Wise Dental Hospital's **Medical Philosophy**

Comfortable treatment

Anesthesia without pain and sedation therapy help reduce dental phobia.

Transparent treatment

We do not engage in over-treatment.

Reliable treatment

10 dental specialists certified by the Ministry of Health and Welfare provide dental treatment.

*Greetings, I am Lim, Se-woong,
the Hospital Director of The Wise Dental Hospital.*

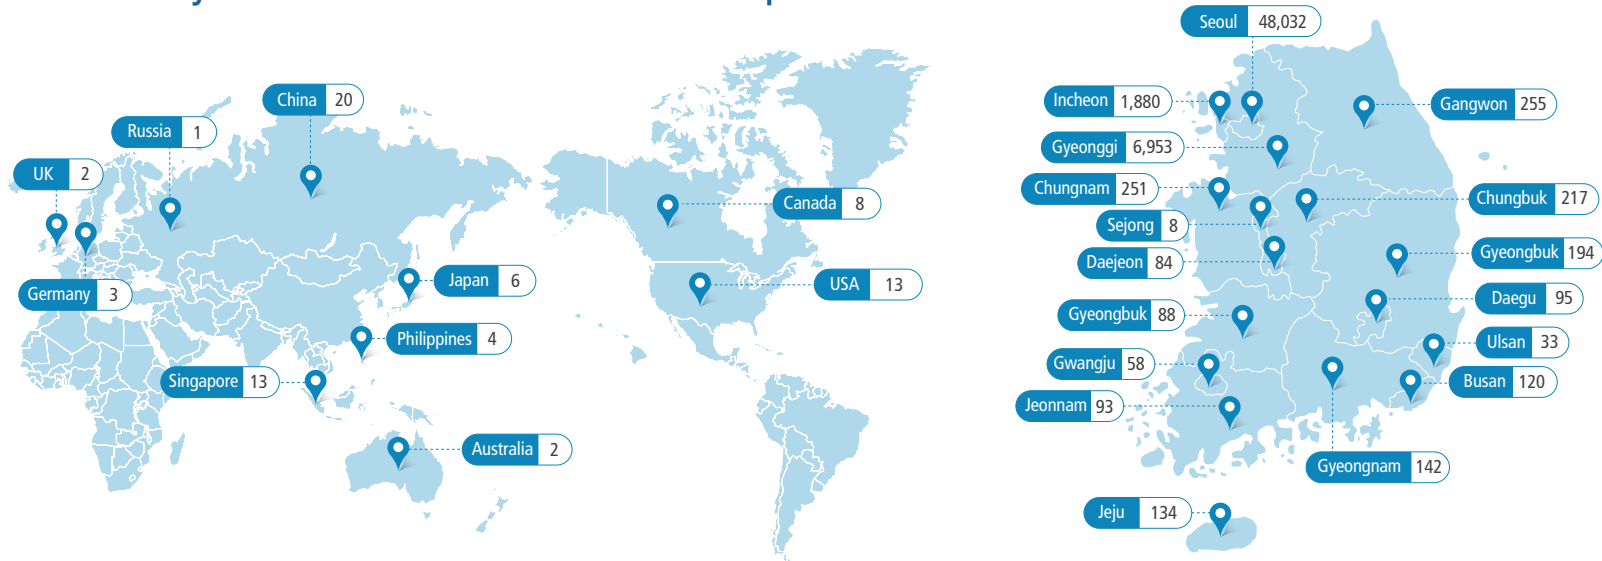

My medical philosophy, stemming from 'not treating patients commercially' and 'only providing essential treatments' from the patient's perspective, is to preserve natural teeth whenever possible. Treating a tooth accurately by distinguishing a certain tooth that can be saved and another tooth that has reached the end of its lifespan, and saving a tooth whenever possible without giving up on it, I believe these are the greatest trust we can offer to patients who trust our dental hospital.

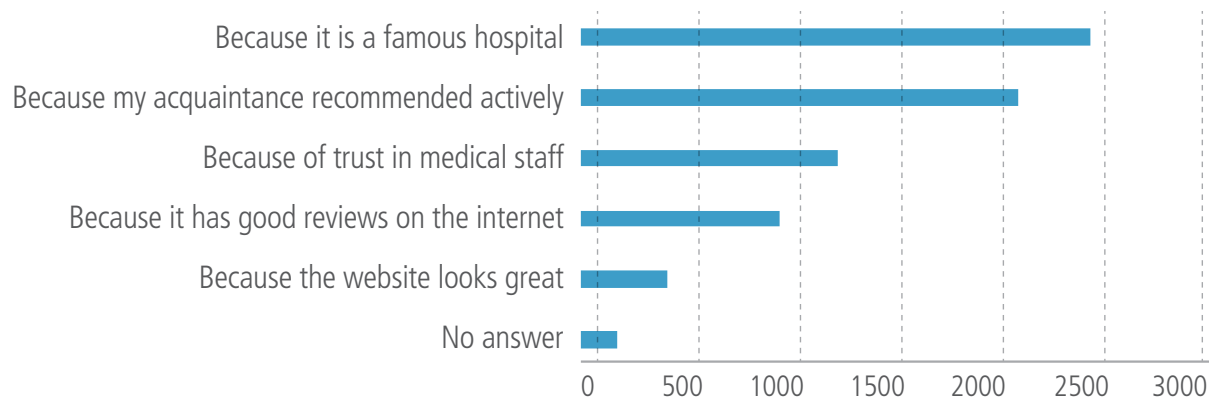

Why Thewise?

Why do patients come to The Wise Dental Hospital

› Dental hospital visited by both Korean and international patients

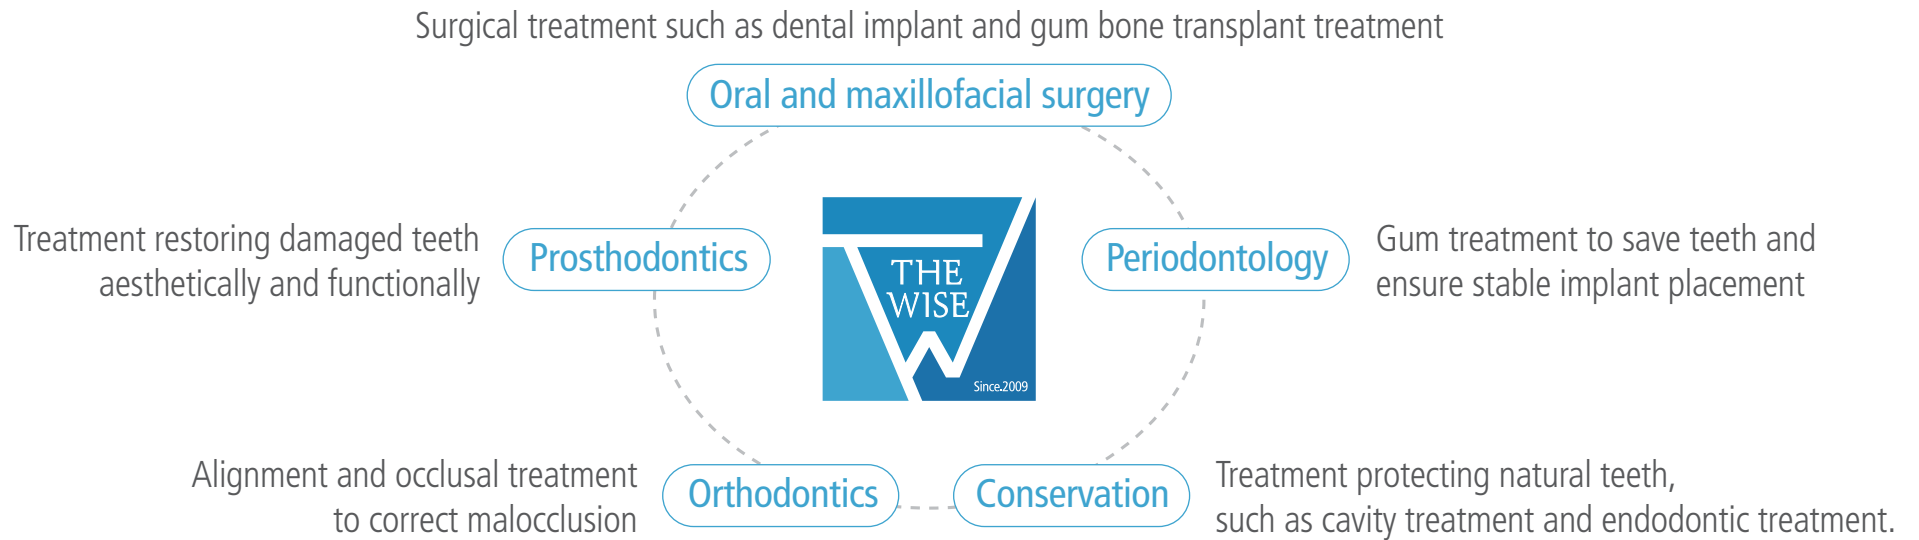

› Why The Wise Dental Hospital?

From the survey conducted by approximately new 7,000 patients who visited The Wise Dental Hospital

This is **why patients** who actually visited the dental hospital **selected The Wise** among a number of dental hospitals.

› The Wise Dental Hospital's Treatment System in Each Department

› Key Competitiveness of The Wise Dental Hospital

6-story dental hospital

Collaboration with 10 dental specialists

All staff who are dental hygienists

Advanced digital equipment

In-house Dental Lab

Hygiene management system

Know-how to restore natural teeth

Painless treatment

Medical institution with continuous research

Dental materials with excellent quality

High surgical success rate

Guarantee system after treatment

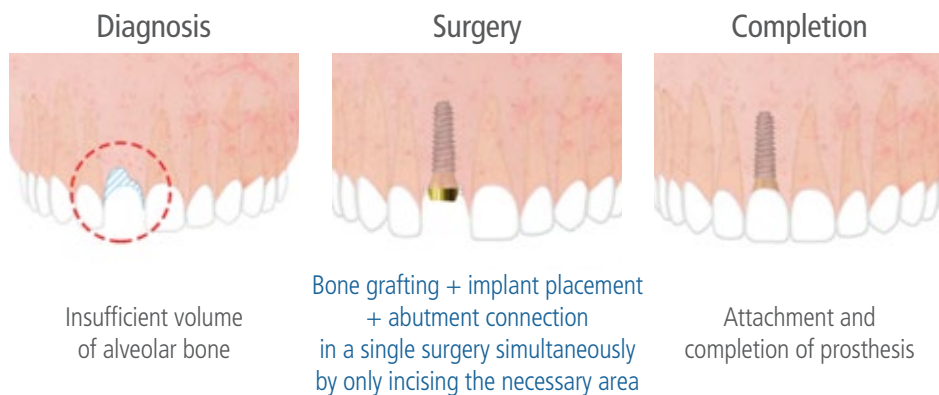

Why Thewise?

Dental Implant of The Wise Dental Hospital

01 Reduce the number of visits

We reduce the burden on overseas and rural patients by completing procedures such as extractions, gum grafting, 1st surgery, and 2nd surgery in a single surgery.

〈 TMG Bone Graft Implant Surgery Process 〉

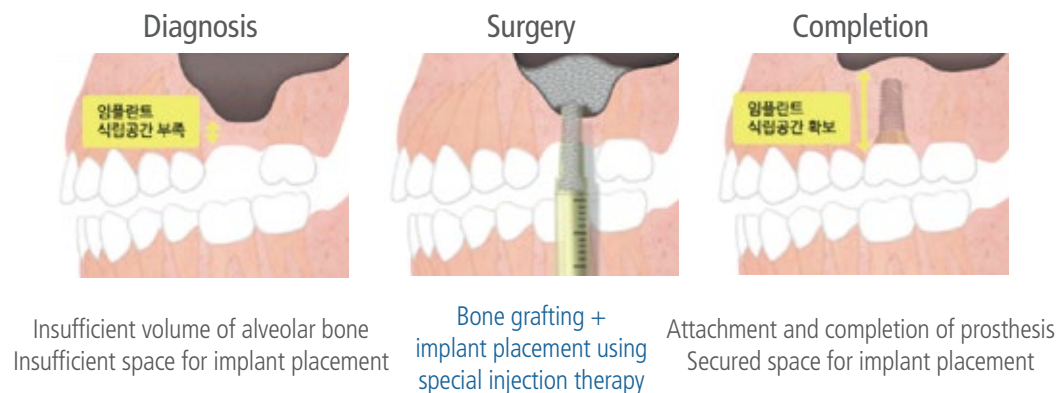

〈 Number of Visits : Traditional Implant vs. The Wise Dental Implant 〉

	Laser periodontal treatment	Tooth extraction	Gum bone grafting	1st surgery (Fixture placement)	2st surgery (Abutment connection)	Prosthesis fitting
Regular implant	X	1st hospital visit	2st hospital visit	3st hospital visit	4st hospital visit	5st hospital visit
The Wise Implant	O		1st hospital visit			2st hospital visit

02 Reduce pain and swelling

As the process of incising and suturing the gums is repeated, pain and swelling, and bruising occurred. Our upper jaw sinus implant surgery without gum incision reduces pain and swelling.

〈 ISI bone grafting implant surgery process 〉

〈 Comparison of the number of incisions in regular implant and The Wise implant 〉

	Laser periodontal treatment	Tooth extraction	Gum bone grafting	1st surgery (Fixture placement)	2st surgery (Abutment connection)	Prosthesis fitting
Regular implant	X		1st incision	2st incision	3st incision	
The Wise Implant	O		No incision(Non-incision injection therapy)			

Why Thewise?

Gum treatment of The Wise Dental Hospital

Reliable, Effective Gum Treatment for Patients Abroad

International visits from all around the world are increasing every year, regardless of nationality or distance. Simple, safe, effective, fast recovery are the key factors that make The Wise Dental Gum Treatment so popular among patients. We appreciate the loyalty of our patients who visit from long distances. In return, we devote our utmost efforts to fulfill patients' expectations and provide the best treatments possible, which continues to this day.

01 Save natural teeth first

Treatment costs are reduced by reducing the number of dental implants with gum treatment.

02 Laser gum treatment

The treatment process has been simplified as it does not require anesthesia or sutures, but we perform gum treatment without gum incision via 'laser gum treatment' with high effects.

Why Thewise?

Aesthetic treatment of The Wise Dental Hospital

"Our dental hospital designs the safest and most ideal teeth with consideration for individual's oral condition with the most appropriate aesthetic treatment."

01 Laminate

The way to improve the shape, size, and color, of the front teeth by attaching a very thin porcelain plate to the surfaces (front surfaces) of slightly trimmed and reduced teeth

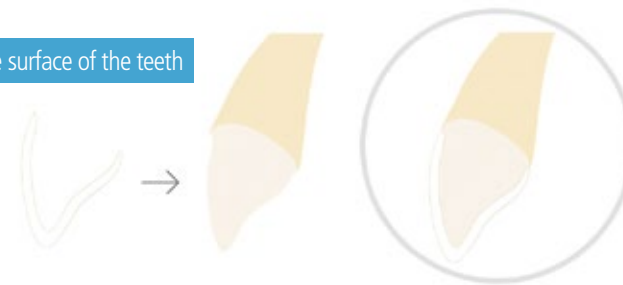

Attached to the outermost surface of the teeth

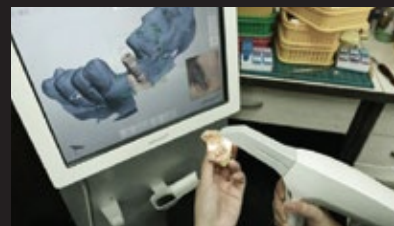

02 All-ceramic.

The way to improve the shape, size, and color of the teeth by wearing a dental prosthesis cap on the entire tooth, in a case where treatment with laminate is difficult due to a wide treatment range

Attached to the entire surface of the teeth

"The reason why our hospital can quickly provide comfortable prosthetics like natural teeth, it is thanks to The Wise Dental Hospital's in-house Dental Lab."

The Wise Dental Hospital has established an in-house Dental Lab's system for rapid communication with dental doctors in each field, enabling the lab's specialists to make ideal prosthetics for individuals. Our hospital is able to produce custom prosthetics via sufficient communication with the prosthodontics medical staff, and endeavors to reduce the cost burden with our in-house Dental Lab.
